

# WILLIAM ELIAS

## Senior DevOps / Platform Engineer

586.438.6057 | WylElias.123@gmail.com | linkedin.com/in/wylelias | github.com/howlcipher

CI/CD & Release Automation | Production Reliability

### PROFESSIONAL SUMMARY

---

Senior DevOps and platform engineer with 10+ years spanning software delivery, production operations, infrastructure, networking, databases, and automation. Designed the standard .NET CI/CD and release pattern for an estate of approximately 60 internal web applications, led enterprise credential remediation across 100+ repositories, and co-led production server migration and DR cutover work. Builds secure, heavily tested internal tooling in C#/.NET, Python, PowerShell, and SQL Server, and drove observability standardization with Azure Monitor, Application Insights, and KQL that fed a large-scale application-estate reduction. Works daily in Azure DevOps, GitHub Actions, and Azure Key Vault, and layers applied AI and agentic engineering on top of this platform and automation foundation.

### CORE EXPERTISE

---

**DevOps & Release Engineering:** Azure DevOps YAML, Azure DevOps Classic Release, Deployment Groups, Azure DevOps REST APIs, CI/CD, Reusable Pipeline Templates, Pipeline as Code, Release Gates, GitHub Actions

**Automation & Software Engineering:** Python, PowerShell, C#, Go, Rust, Axum, Bash, SQL, ASP.NET Core

**Security & Identity:** Azure Key Vault, Managed Identity, OAuth 2.0, IAM, Credential Discovery, Credential Classification, Git History Rewriting, Credential Remediation, Credential Scanning

**Observability & Reliability:** Application Insights, Azure Monitor, KQL, Serilog, Structured Logging, Log Analysis, Incident Triage, RCA, SLA-Driven Support

**Infrastructure & Networking:** Windows Server, IIS, Active Directory, SQL Server, Load Balancers, Firewalls, Cisco, Meraki, Docker

**AI & Agentic Systems:** Claude Code, OpenAI Codex CLI, Gemini CLI / Antigravity, Ollama / Local LLMs, Model Context Protocol (MCP), RAG, ChromaDB, Vector Search & Embeddings, Multi-Agent Orchestration

### PROFESSIONAL EXPERIENCE

---

#### Stellantis Financial Services

Feb 2023 - Present

*Production Support Engineer - DevOps & Automation | Auburn Hills, MI*

- Engineering work spans CI/CD standardization, production releases, secrets remediation, internal application development, observability, server migration, and application-estate reduction in a regulated financial-services environment.
- Designed the deployment automation and release guardrails behind an approximately 60-application .NET estate across five servers, replacing inconsistent, ad hoc deployment paths with a standard build/release pattern.
- Build secure, heavily tested operational tooling, including credential-remediation utilities and an internal operations portal, using C#/.NET, Python, PowerShell, SQL Server, and Azure services.
- Handle production incidents and releases while coordinating across Windows, DBA, IAM, firewall, and load-balancer teams to keep environments stable and release-ready.

#### HBK Engineering Solutions

Jul 2020 - Feb 2023

*DevOps Engineer - Python Automation | Southfield, MI*

- Created a Python and Tkinter XML-output automation system that reduced data-processing time by 60%.
- Automated SQL output processing with Python, saving more than 40 hours per month.
- Developed database configuration tools that streamlined customer onboarding workflows and reduced repetitive setup.
- Built NSIS installer and uninstaller packages, maintained Git workflows and developer tooling, and provided live technical troubleshooting for customers.

## SELECTED ENGINEERING PROGRAMS

---

### CI/CD & Release Engineering

- Designed the standard .NET CI/CD and release pattern for a ~60-application, five-server estate with no prior consistent path; 28 of 60 wired and build-verified, 27 green.

*Technology: Azure DevOps YAML, Azure DevOps Classic Release, Deployment Groups, Azure DevOps REST, PowerShell, Python, IIS, MSBuild, .NET Framework, .NET 8, WSL2, Rancher Desktop, IIS ARR*

### Credential Hygiene & Secrets Remediation

- Removed exposed credentials from 100+ repositories via Git-history remediation, then built a .NET 8 discovery/Key Vault migration utility backed by 62 automated tests.

*Technology: .NET 8, C#, Spectre.Console, xUnit, Azure Key Vault, Managed Identity, Python, PowerShell, Git History Rewriting*

### Server Migration & DR Cutover

- Co-led build-out of four new production/test servers and coordinated a zero-downtime cutover from legacy infrastructure.

*Technology: Windows Server, IIS, Active Directory, PowerShell, SQL Server, Load Balancers*

### Internal Web Apps & Support Portal

- Expanded a query extractor into a modular internal support portal with per-module access policies, a permanently retained SOX audit trail, and 156 automated tests.

*Technology: ASP.NET Core 8, Razor Pages, C#, xUnit, SQLite, SQL Server, Serilog, Application Insights, Windows Authentication, DiffPlex, FastAPI*

### Observability & Telemetry

- Helped establish Application Insights as the team standard, added structured logging estate-wide, authored the KQL library, and built a usage-based sunset list.

*Technology: Application Insights, Azure Monitor, KQL, Serilog, .NET*

### Python Ops Automation & Estate Reduction

- Built Python automation for database copying, payload triage, and report generation, then scripted the retirement of 300+ legacy applications.

*Technology: Python, uv, FastAPI, SQL Server, PowerShell, IIS, Go*

## EARLIER TECHNICAL EXPERIENCE

---

### Intrepid Control Systems - QA Developer | Mar 2020 - Apr 2020

Wrote Mocha tests and debugged APIs across software and hardware integrations.

### Project Worldwide - Network Engineer | Jan 2020 - Mar 2020

Configured Cisco and Meraki infrastructure and executed multi-state migrations with minimal downtime.

### Ford Motor Company - Network Standards Engineer | Sep 2019 - Dec 2019

Implemented global network standards and created scalable documentation and IP-management systems.

### Trendset Communications Group - IT Network Engineer | Sep 2015 - Jun 2019

Enforced network standards, maintained configuration files, and supported critical production infrastructure.

## EDUCATION & CERTIFICATIONS

---

M.S. Cyber Defense (In Progress) - Dakota State University

B.S. Information Technology - Colorado State University Global Campus

B.B.A. Business Administration - Rochester College

Cisco Certified Network Associate (CCNA) - Previously held - Cisco Networking Academy (2014 - 2017)
