PROFESSIONAL SUMMARY

DevOps, Platform, and Automation Engineer with 10+ years across software delivery, production operations, infrastructure, and networking. Builds CI/CD standardization, deployment automation, credential-remediation tooling, internal developer platforms, and production-support applications. Brings hands-on production troubleshooting, observability, Git history remediation, OAuth/OIDC security automation, and AI-assisted engineering with human review.

PROFESSIONAL EXPERIENCE

Stellantis Financial Services US

Feb 2023 - Present

Production Support Engineer | DevOps & Automation | Auburn Hills, MI · Hybrid

- Directed a CI/CD standardization program across a 60-repository, 104-application internal estate, building inventory, verification, and rollout-tracking tooling and completing standardized-pipeline rollout to 28 repositories. Created 56 Azure DevOps build/release definitions across 28 applications; verified 27/28 builds and dry-run validated 25/28 deployment paths, identifying six latent delivery defects.
- Designed and delivered a Go-based self-service deployment CLI covering the build-to-rollback lifecycle, including guided setup, Azure DevOps integration, generated pipeline configuration, host auditing, and automated post-deployment verification.
- Led a credential-remediation initiative that scanned thousands of configuration files, reduced 866 findings to 67 distinct exposed secrets, and built classification tooling to support migration to Azure Key Vault.
- Built and operated Git-history remediation automation for removing committed credentials from source control, with repository discovery, interchangeable rewrite engines, and coordinated force-push cleanup.
- Built Python/FastAPI dashboards, a .NET 8 Blazor internal portal, and an internal ASP.NET Core production-support application for operational workflows and engineering visibility; scripted retirement of 300+ unused legacy applications and built AI-assisted knowledge tooling with engineer-review controls.
- Lead weekly production releases, database migrations, and SLA-driven incident triage; troubleshoot application, API, SQL Server, Auth0, OAuth/OIDC, configuration, and network issues. Audited disaster-recovery pipeline definitions and investigated server/container migration paths to identify broken or obsolete deployment paths and support remediation planning.

HBK - Hottinger Brüel & Kjær

Jul 2020 - Feb 2023

DevOps Engineer - Python Automation | Southfield, MI · Remote

- Created Python/Tkinter XML-output automation that reduced data-processing time by 60%; automated SQL output processing to save more than 40 hours per month.
- Developed database-configuration tools to streamline customer onboarding and reduce repetitive environment setup.
- Built NSIS installer/uninstaller packages, maintained Git workflows and developer tooling, and provided live customer troubleshooting.

CORE EXPERTISE

Software & Backend: Python, FastAPI, C#, .NET, Blazor, ASP.NET Core, SQL Server, REST APIs

DevOps & Delivery: Azure DevOps, CI/CD, Release Automation, YAML Pipelines, Git, Containerization

Automation (*Python/PowerShell professionally; Go for deployment tooling*): Python, PowerShell, Workflow Automation, Operational Tooling, Go

Production & Reliability: Azure Monitor, Application Insights, KQL, Structured Logging, Incident Triage, RCA

Infrastructure & Application Operations: Windows Server, IIS, Active Directory, SQL Server, Load Balancers, Firewalls

Security & Identity: Auth0, OAuth 2.1 / OIDC, IAM, Credential Remediation, Git History Remediation, Azure Key Vault

AI-Enabled Engineering (*Internal tools & projects*): LLM APIs, MCP, RAG, Agent Workflows, Human Review, Engineering Knowledge Systems

SELECTED ENGINEERING HIGHLIGHTS

CI/CD & Release Engineering

- Directed a CI/CD standardization program across a 60-repository, 104-application internal estate, building inventory, verification, and rollout-tracking tooling and completing standardized-pipeline rollout to 28 repositories.

Tech: Azure DevOps, Python, PowerShell, .NET, IIS

Security & Credential Remediation

- Led a credential-remediation initiative that scanned thousands of configuration files, reduced 866 findings to 67 distinct exposed secrets, and built classification tooling to support migration to Azure Key Vault.
- Built and operated Git-history remediation automation for removing committed credentials from source control, with repository discovery, interchangeable rewrite engines, and coordinated force-push cleanup.

Tech: Python, Git, BFG Repo-Cleaner, Azure Key Vault

Deployment Automation & Release Tooling

- Designed and delivered a Go-based self-service deployment CLI covering the build-to-rollback lifecycle, including guided setup, Azure DevOps integration, generated pipeline configuration, host auditing, and automated post-deployment verification.

Tech: Go, Azure DevOps, REST APIs, CI/CD

SELECTED OPEN-SOURCE ENGINEERING

HowlPlane

github.com/howlcipher/howlplane

- Built a Python/Go engineering control plane that routes work across coding agents, reconciles independent reviews, and runs deterministic verification.
- Added durable evidence recording and human-controlled authority boundaries for consequential actions, with shared project context and CI/security checks.

RedrawUS

github.com/howlcipher/redistricting-map

- Built a multi-state geospatial analysis platform with Python/R data pipelines and an interactive JavaScript map, persistent browser caching, and Web Workers.
- Processes geographic datasets with GeoPandas, Shapely, and GerryChain; includes pytest, Vitest, and Playwright tests for data processing and application behavior.

EARLIER EXPERIENCE

QA Developer, Intrepid Control Systems

Mar 2020 - Apr 2020

- Wrote Mocha tests and debugged APIs across software and hardware integrations.

Network Engineer, Project Worldwide

Jan 2020 - Mar 2020

- Configured Cisco/Meraki infrastructure and executed multi-state network migrations with minimal downtime.

Network Standards Engineer, Ford Motor Company

Sep 2019 - Dec 2019

- Implemented global network standards, documentation, and IP-management systems.

IT Network Engineer, Trendset Communications Group

Sep 2015 - Jun 2019

- Maintained network standards, configurations, and documentation; supported critical production infrastructure.

EDUCATION & CERTIFICATIONS

M.S. Cyber Defense (In Progress) - Dakota State University

B.S. Information Technology - Colorado State University Global Campus

B.B.A. Business Administration - Rochester College

CCNA (Previously Held) - Cisco Networking Academy (2014 - 2017)
