

WILLIAM ELIAS

Senior DevOps & Platform Engineer | Production Support & AI Automation

586.438.6057 | WylElias.123@gmail.com | linkedin.com/in/wylelias | github.com/howlcipher

Azure DevOps // Application Operations // Python + Go // Networking

PROFESSIONAL SUMMARY

Senior DevOps and platform engineer with 10+ years across application operations, software delivery, networking, databases, infrastructure, and automation. Created 100+ Azure DevOps pipelines supporting .NET build, deployment, and release workflows. Supports Azure-connected and IIS-hosted applications using Azure Monitor, Application Insights, KQL, application logs, connection strings, and environment configuration. Handles SLA-driven Freshservice support, Jira workflows, OAuth-based identity and access, release coordination, SQL changes, and network-connectivity troubleshooting. Builds applied AI and agentic tooling for incident response, engineering enablement, knowledge retrieval, and delivery automation in regulated environments.

CORE SKILLS

DevOps & Platform: Azure DevOps, CI/CD, YAML Templates, Pipeline as Code, GitHub Actions, Git, Bitbucket, IIS, Windows Server, Docker, Helm, Release Management

Application Operations & Production Support: Freshservice, SLA-Based Support, Incident Triage, Application Administration, Production Troubleshooting, Log Analysis, Release Support, Environment Readiness, Runbooks and Documentation, Jira, Application Configuration, Connection Strings

Applied AI & Agentic Systems: Claude Code Skills, Model Context Protocol (MCP), Multi-Agent Orchestration, Context Engineering, LLM API Integration, Prompt Engineering, AI Guardrails, AI Security, RAG, ChromaDB, Confluence, SharePoint

Languages & Automation: Python, Go, C#, .NET Framework, PowerShell, Bash, SQL, REST APIs, ETL, XML Processing

Cloud, Data & Security: Azure Monitor, Application Insights, KQL, Key Vault, Secret Rotation, OAuth 2.0, Identity and Access Management, Authentication and Authorization, SQL Server, SQLite, Database Migrations, Bandit SAST, Credential & PII Scanning, Regulated Environment Controls

Infrastructure & Networking: Cisco, Meraki, VLANs, Firewalls, Packet Capture, Network Standards, Network Connectivity Troubleshooting

PROFESSIONAL EXPERIENCE

Stellantis Financial Services

Feb 2023 - Present

Production Support Engineer - DevOps & Automation | Auburn Hills, MI

- Monitor and troubleshoot Azure-connected and IIS-hosted .NET applications using Azure Monitor, Application Insights, KQL, and application logs; manage connection strings and environment-specific application configuration.
- Manage production incidents and service requests through Freshservice against SLA targets, coordinate technical work and documentation in Jira, and troubleshoot OAuth-based identity/access and network-connectivity issues across application environments.
- Created 100+ Azure DevOps pipelines supporting .NET application build, deployment, and release workflows using reusable YAML templates, Python, PowerShell, artifact management, IIS deployment, environment controls, and approval gates.
- Architected the underlying reusable pipeline framework behind the 70+ application rollout scope, then encoded onboarding into AI-assisted skills that generate and roll out pipeline definitions per repository.
- Led weekly release coordination and zero-data-loss database migrations, and built an environment-readiness dashboard comparing code, runtime versions, and IIS objects across servers before promotion, plus an operations portal centralizing team links and DBA-approval SQL payloads.
- Built an internal AI knowledge platform synchronizing Jira, Confluence, and SharePoint for grounded production context, governed by credential, PII, and documentation-drift gates, plus AI-assisted incident-triage and RCA tooling reviewed by engineers.

HBK Engineering Solutions

Jul 2020 - Feb 2023

DevOps Engineer - Python Automation | Southfield, MI

- Created a Python and Tkinter XML-output automation system that reduced data-processing time by 60%.
- Automated SQL output processing with Python, saving more than 40 hours per month.
- Developed database configuration tools that streamlined customer onboarding workflows and reduced repetitive setup.
- Built NSIS installer and uninstaller packages, maintained Git workflows and developer tooling, and provided live technical troubleshooting for customers.

PROJECTS

Multi-Agent Engineering Library

Open-source AI context system for terminal agents

https://github.com/howlcipher/ai_knowledge_library

- Built a filesystem-based knowledge and rules library that loads one canonical rulebook, skill set, and profile context into Claude Code, Codex, and Gemini CLI alike, so agent behavior stays consistent across every terminal assistant.
- Ships 40 domain skills with hallucination guardrails, MCP integrations, and ChromaDB context pruning, packaged with Docker, Helm, and a cross-platform installer, guarded by GitHub Actions running CodeQL, Bandit SAST, and cross-platform tests.

EARLIER TECHNICAL EXPERIENCE

Intrepid Control Systems - QA Developer | Mar 2020 - Apr 2020

Wrote Mocha tests and debugged APIs across software and hardware integrations.

Project Worldwide - Network Engineer | Jan 2020 - Mar 2020

Configured Cisco and Meraki infrastructure and executed multi-state migrations with minimal downtime.

Ford Motor Company - Network Standards Engineer | Sep 2019 - Dec 2019

Implemented global network standards and created scalable documentation and IP-management systems.

Trendset Communications Group - IT Network Engineer | Sep 2015 - Jun 2019

Enforced network standards, maintained configuration files, and supported critical production infrastructure.

EDUCATION & CERTIFICATIONS

M.S. Cyber Defense (In Progress) - Dakota State University

B.S. Information Technology - Colorado State University Global Campus

B.B.A. Business Administration - Rochester College

Cisco Certified Network Associate (CCNA) - Previously held - Cisco Networking Academy (2014 - 2017)
