CI/CD & Release Automation | Production Reliability

PROFESSIONAL SUMMARY

Senior DevOps and platform engineer with 10+ years spanning software delivery, production operations, infrastructure, networking, databases, and automation. Designed the standard .NET CI/CD and release pattern for an estate of ~60 internal web applications, remediated exposed credentials across 100+ repositories, co-led production server migration and DR cutovers, and scripted the retirement of 300+ legacy applications. Builds secure, tested internal tooling in C#/.NET, Python, PowerShell, Go, and SQL Server; helped establish Application Insights as the team observability standard and drove adoption across legacy applications. Hands-on with Azure DevOps, GitHub Actions, Azure Key Vault, Azure Monitor, KQL, and applied AI/agentive engineering layered on top of a production platform and automation foundation.

CORE EXPERTISE

DevOps & Release Engineering: Azure DevOps YAML, Azure DevOps Classic Release, Deployment Groups, Azure DevOps REST APIs, CI/CD, Reusable Pipeline Templates, Pipeline as Code, Release Gates, GitHub Actions

Automation & Software Engineering: Python, PowerShell, C#, Go, Rust, TypeScript, JavaScript, Bash, SQL

Security & Identity: Azure Key Vault, Managed Identity, OAuth 2.0, IAM, Credential Discovery, Credential Classification, Git History Rewriting, Credential Remediation, Credential Scanning

Observability & Reliability: Application Insights, Azure Monitor, KQL, Serilog, Structured Logging, Log Analysis, Incident Triage, RCA, SLA-Driven Support

Infrastructure & Networking: Windows Server, IIS, Active Directory, SQL Server, Load Balancers, Firewalls, Cisco, Meraki, Docker

AI & Agentic Systems: Claude Code, OpenAI Codex CLI, Gemini CLI / Antigravity, Ollama / Local LLMs, Model Context Protocol (MCP), RAG, ChromaDB, Vector Search & Embeddings, Multi-Agent Orchestration

PROFESSIONAL EXPERIENCE

Stellantis Financial Services US

Feb 2023 - Present

Production Support Engineer - DevOps & Automation | Auburn Hills, MI · Remote

- Engineering work spans CI/CD and release standardization, production reliability, secrets remediation, internal platform development, observability, server migration, and application-estate reduction in a regulated financial-services environment.
- Designed the standard .NET build and release pattern for an estate of ~60 internal apps across five servers, replacing inconsistent deployment paths with reusable automation, release definitions, and deployment guardrails.
- Build production operational tooling with C#/.NET, Python, PowerShell, Go, and SQL Server, including credential-remediation utilities, Key Vault migration tooling, and a modular internal support platform with automated testing, auditability, and security controls.
- Support production incidents and releases while coordinating across Windows, DBA, IAM, firewall, and load-balancer teams to maintain environment readiness and production reliability.

HBK - Hottinger Brüel & Kjær

Jul 2020 - Feb 2023

DevOps Engineer - Python Automation | Southfield, Michigan / Remote

- Built Python-based XML processing automation that reduced data-processing time by 60%.
- Automated SQL output processing and operational workflows with Python, saving 40+ hours per month of manual effort.
- Developed database configuration and automation tooling that streamlined customer onboarding and reduced repetitive environment setup.
- Built NSIS installer/uninstaller packages, maintained Git-based development workflows and tooling, and supported application deployment and technical troubleshooting.

SELECTED ENGINEERING PROGRAMS

CI/CD & Release Engineering

- Designed the standard .NET CI/CD and release pattern for a ~60-application, five-server estate with no prior consistent path; 28 of 60 wired and build-verified, 27 green.

Technology: Azure DevOps YAML, Azure DevOps Classic Release, Deployment Groups, Azure DevOps REST, PowerShell, Python, IIS, MSBuild, .NET Framework, .NET 8, WSL2, Rancher Desktop, IIS ARR

Credential Hygiene & Secrets Remediation

- Removed exposed credentials from 100+ repositories via Git-history remediation, then built a .NET 8 discovery/Key Vault migration utility backed by 62 automated tests.

Technology: .NET 8, C#, Spectre.Console, xUnit, Azure Key Vault, Managed Identity, Python, PowerShell, Git History Rewriting

Server Migration & DR Cutover

- Co-led build-out of four new production/test servers and coordinated a zero-downtime cutover from legacy infrastructure.

Technology: Windows Server, IIS, Active Directory, PowerShell, SQL Server, Load Balancers

Internal Web Apps & Support Portal

- Expanded a query extractor into a modular internal support portal with per-module access policies, a permanently retained SOX audit trail, and 156 automated tests.

Technology: ASP.NET Core 8, Razor Pages, C#, xUnit, SQLite, SQL Server, Serilog, Application Insights, Windows Authentication, DiffPlex, FastAPI

Observability & Telemetry

- Helped establish Application Insights as the team standard, added structured logging estate-wide, authored the KQL library, and built a usage-based sunset list.

Technology: Application Insights, Azure Monitor, KQL, Serilog, .NET

Python Ops Automation & Estate Reduction

- Built Python automation for database copying, payload triage, and report generation, then scripted the retirement of 300+ legacy applications.

Technology: Python, uv, FastAPI, SQL Server, PowerShell, IIS, Go

EARLIER TECHNICAL EXPERIENCE

Intrepid Control Systems - Quality Assurance Developer | Mar 2020

Developed and executed Mocha tests for internal applications and debugged APIs across software and hardware integrations.

Project Worldwide - Network Engineer | Jan 2020 - Mar 2020

Configured Cisco switching and Meraki wireless infrastructure, created network/IP-addressing standards, and supported multi-state network migrations with minimal downtime.

Ford Motor Company - Network Engineer | Sep 2019 - Dec 2019

Implemented standardized network configurations, built documentation and IP-management systems, and supported enterprise network migrations.

Trendset Communications Group - Network Engineer | Sep 2015 - Jun 2019

Administered and audited network infrastructure across ports, IP addressing, VLANs, and device configurations while supporting production connectivity and availability.

EDUCATION & CERTIFICATIONS

M.S. Cyber Defense - In Progress - Dakota State University

B.S. Information Technology - Colorado State University Global Campus

B.B.A. Business Administration - Rochester College

CCNA - previously held - Cisco Networking Academy (2014 - 2017)
